*designing water*

## Our company

We are an Italian company which has been operating worldwide for over 50 years designing and manufacturing private and public fountains.

We have gained our knowledge in the entertainment industry with our unique choreographies of water, light and fire, and this allowed us to work with architects and designers from all over the world.

Our work is always evolving, in order to find the latest technological solutions to give exciting performances for each event and to meet the expectations of our customers in the best way possible.

Our components are made from unalterable materials which guarantee a long duration and a great reliability. Furthermore, our cooperation with companies which are leaders in the hydraulic field, ensures to provide high quality products and customer-care worldwide.

Creativity, dedication and customer-care have always been essential for our company's activities, and this gives us a strong recognition at both national and international level; for us designing fountains isn't just a job, but it is a creative challenge to turn customer's requests into emotions.

# Our passion

**CREATIVITY** We give the water ever-changing shapes, in order to satisfy the customer's requests. Each project is a creative challenge that we accept with passion.

**MANUFACTURING** The manufacturing process is supported in the most modern working technologies. We perform accurate control tests on each product.

**SHOW** We shape water with colors in sync with music, creating mesmerising choreographies. Viewers will be enchanted.

**DESIGN** We use our knowledge in the hydraulic, electrical and automation fields, and we make it available to architects and designers.

**INSTALLATION** We offer support and supervision during the installation process up to the final test. Our technicians have many years of experience.

**CUSTOMER CARE** We answer to your questions about system management and maintenance and we guarantee technical support assistance.

*Great brands we worked with on amazing projects.*
